## -- AWWU Responds to Earthquake Related Water Issues --

AWWU has issued a boiled water advisory out of precaution; however, there are no known water contamination issues. Our system has remained pressurized except for isolated areas we are in the process of identifying. If you have pressure to your home, you should be fine. We have no plans to shut down the entire water system. We will have isolated outages as we repair broken water mains. We will provide updates as they become available.

AWWU is investing to ensure reliable service and safeguard public health and the environment, long into the future. For more information and construction updates, visit [www.AWWU.biz](http://www.AWWU.biz). We are also on Facebook and Twitter.
